Pseudo schema

Elements in structural order.

document

The root element. Nests all other elements.

exhibit

The title given to the exhibit on the CCP website. This is the first element required inside the document.

CCPheader

The header given to the document being encoded. The exhibits in CCP have subsections. This header is to be used for those subsections.

front

If the document has a front page, like title pages, tables of contents, introductory essays, etc., then they should be contained within this element. Can contain subhead and title.

back

If the document has back matter, like end notes, bibliography, etc., then they should be contained within this element.

title

The title of the document being encoded.

subhead

For a header that is not the title.

body

The contents of the document that fall under the title or subhead.

pb

Marks a break between two pages.

Ρ

Marks a paragraph and separation between two paragraphs.

caption

Contains the content in a caption under an image, if any.

 ${\tt pagenum}$

Marks a page number.

```
model mixed content
```

An element that contains other non-structural elements. This element is used in the definition of structural elements, giving them the flexibility as to what kind of content or elements they can include.

emph

Marks emphasized words. That includes words italicized, boldened, in caps, etc. Does not include words that may be highlighted.

hi

Marks highlighted text.

abbr

Marks abbreviated words. The full attribute can be used to mention the full form of the abbreviated word.

date

Marks a date. The when attribute can be used to give the date in the calendar date format.

foreign

Marks a word in a language that is not the standard language of the document. The lang attribute can be used to specify the language.

list

Marks a list. Contains item element.

item

Marks an item in a list. The n attribute should be used to give a number to the item.

note

Marks a note such as an endnote, footnote, and so forth.

name

Marks a name. The type attribute can be used to specify whether it is a first name, last name, etc.

measurement

Marks a text that denotes a measurement. The unit attribute must be used to specify the unit of measurement.

quantity

Marks the quantity. The amount attribute should be used to denote the quantity in an integer format. Can include decimals.

timer

Marks the timer. The minutes attribute should be used to denote the time in an integer format.

faded

Marks a text that is legible but completely clear.

location

Marks the location. The type attribute should be used to specify what kind of a location is mentioned.

year

Marks the year. The type element should be used to state the year in the calendar format.

lb

Marks a line break.

<u>Attributes</u>

Name - type The type of name. First name Surname Honorific Alias Enslaved name Chosen name Full name Date - when Date in calendar format. Abbr - full The full form of the abbreviated text. Foreign - lang The language. English French Latin Spanish Unknown Item - n Denotes the item number. Measurement - unit The unit of measurement. Lbs Dos Pint Ounces Quart Tablespoon Teas-cup Gill Bits Enough Little Gallons Inch Spoons Quince Dozen Wineglass Timer - minutes Denotes the imnutes in a non-negative integer format. Quanttly - amount Denotes the quantity in a decimal format. Address Ardress Tere type of location.
